## Experiences

Senior Software Engineer | BlueCargo August 2024 – March 2026

- Led end-to-end integration with U.S. Bank Payments API, enabling automated money movement to reduce manual touches
- Scaled a near real-time container tracking system, ingesting public port data to generate availability insights for customers
- Architected core data pipelines and analytics layer (dbt) to model invoices, containers, rate terms + shipment milestones
- Transformed fragmented, unstructured logistics data into structured financial flows, powering audit + AP/AR automation

Senior Software Engineer | EXO Freight June 2022 – July 2024

- Tech lead for Pulse platform, monetizing financial infra: freight brokering, factoring, payments, and banking (~\$100K ARR)
- Built + scaled core systems: pricing algorithms, carrier recommendations, and API-driven network growth (20K carriers)

Co-Founder & CTO | ecoText August 2018 – September 2022

- Co-founded and scaled an edtech startup, leading engineering, hiring, and product strategy for a 10-person team
- Secured \$600K in seed funding and built core infrastructure, including an automated eBook ingestion and indexing system

Founder | Triumph Software (Loggit) October 2016 – June 2023

- Solo founder built and launched a professional development tracking app, owning full-stack dev, product and go-to-market
- Adopted by two school administrative units, supporting 600+ employees and real-world administrative workflows

Associate Solutions Architect | Bottomline Technologies September 2020 – June 2021

- Technical architect designed and integrated business transaction banking solutions for mid to large enterprise customers
- Cultivated deep knowledge of enterprise design principles to design, implement, test, and support system integrations

Principal & Associate | Rines Angel Investment Fund May 2017 – May 2020

- Managed a donor-created fund focusing on private equity and angel investments in entrepreneurial ventures
- Led pre-screening duties and nuanced due diligence as a value-add for angel groups in New England

Software Engineer | Oracle Corporation May 2018 – August 2018

- Fixed code security issues with static code analysis working with dependencies of 200-person cloud teams
- Designed new large-scale systems, deployments, and architecture automation, primarily focusing on DNS

## Education

University of New Hampshire | B.S. in Information Technology & B.A. in Philosophy May 2020

- Combined GPA: 4.0 | Summa cum laude with honors designation
- Undergraduate research: [“Artificial Intelligence as a Disinformation Engine”](#)
- Three-time Paul Holloway Prize entrepreneurship competition finalist (+1 semifinalist)
- Cyber-security team leader, finished 3<sup>rd</sup> at regionals

## Skills

- **People:** technical lead, systems engineer, product management, process automation, compliance, executive coaching
- **Programming:** DBT, Django, GraphQL, Java/JavaScript, Node, PHP, Python, React, SQL, Tailwind, TypeScript
- **Tools:** AWS, Docker/Kubernetes, GCP, GitHub, Kali, Kibana, Playwright, Selenium, VS Code
- **AI:** Agents, Claude, GitHub Copilot, Gemini, Grok, Ollama, OpenClaw/ZeroClaw
